| 10                                   | 15,194                    | 39                       | 418,359                    | 21                            | 13,816                    | 37                       | 378,610                    |                               |                           |                          |                            |
| 11                                   | 14,370                    | 38                       | 395,598                    | 22                            | 13,741                    | 37                       | 376,764                    |                               |                           |                          |                            |

|                | FLOW           | TEMP  | HYDRO (kWh)       |
|----------------|----------------|-------|-------------------|
| <b>TOTAL</b>   | <b>375,221</b> |       | <b>12,384,008</b> |
| <b>AVERAGE</b> | 12,507         | 39.81 | 412,800           |
| <b>MAXIMUM</b> | 15,194         | 48.80 | 469,646           |

NOTES: TEMP shown in (°F) Fahrenheit, FLOW shown in (cfs) cubic feet per second, and HYDRO shown in (kWh) kilo watt hours.

Putting it in perspective: The average monthly use per home (kWh):

1,000

We generated enough to power this many homes during this month:

12,384
