HYDROPOWER: A LOCAL ADVANTAGE TO YOUR BUSINESS

Affordable energy gives your business a competitive edge - and that's exactly what KU's hydropower provides. We own and operate seven hydroelectric plants that generate nearly a third of our customers' electricity needs. This clean, reliable, and low-cost resource reduces the amount of energy we need to purchase, helping keep our rates among the lowest in the state.

By harnessing the natural strength of the Fox River, we deliver sustainable energy that supports your business today, keeps costs stable, and strengthens your competitive advantage into the future.
